To Whom It May Concern,

Yesterday, the students of Chandler Magnet School had the opportunity to learn "Fire Safety" through the bewitching magic performance of Jason Kallio. We divided the student body into two sections. The little ones in Preschool through second grade were mesmerized with Jason's on stage presence and were able to learn much. A little later the student in grades three through six were treated to his program at a level appropriate to them.

Jason taught the students the importance of staying away from fire, about electrical outlets and appliances and prepared them for what to do should ever they be involved in a fire.

His magic tricks and his exciting style brought this important subject to life and I feel that each student left the performance knowing the significance of not playing with matches and how to "STOP, DROP and ROLL."

I would certainly recommend him to anyone.

Sincerely,

A handwritten signature in cursive that reads "Mary E. Rowe".

Mary E. Rowe, Principal

A handwritten note in cursive that says "Thank You!" with a large exclamation point.
